

Future European R&I for a Sustainable Transition in Construction and the Built Environment: the B4P Partnership development

Isabel RODRIGUEZ-MARIBONA & Alain ZARLI – November 2020

ECTP in a nutshell

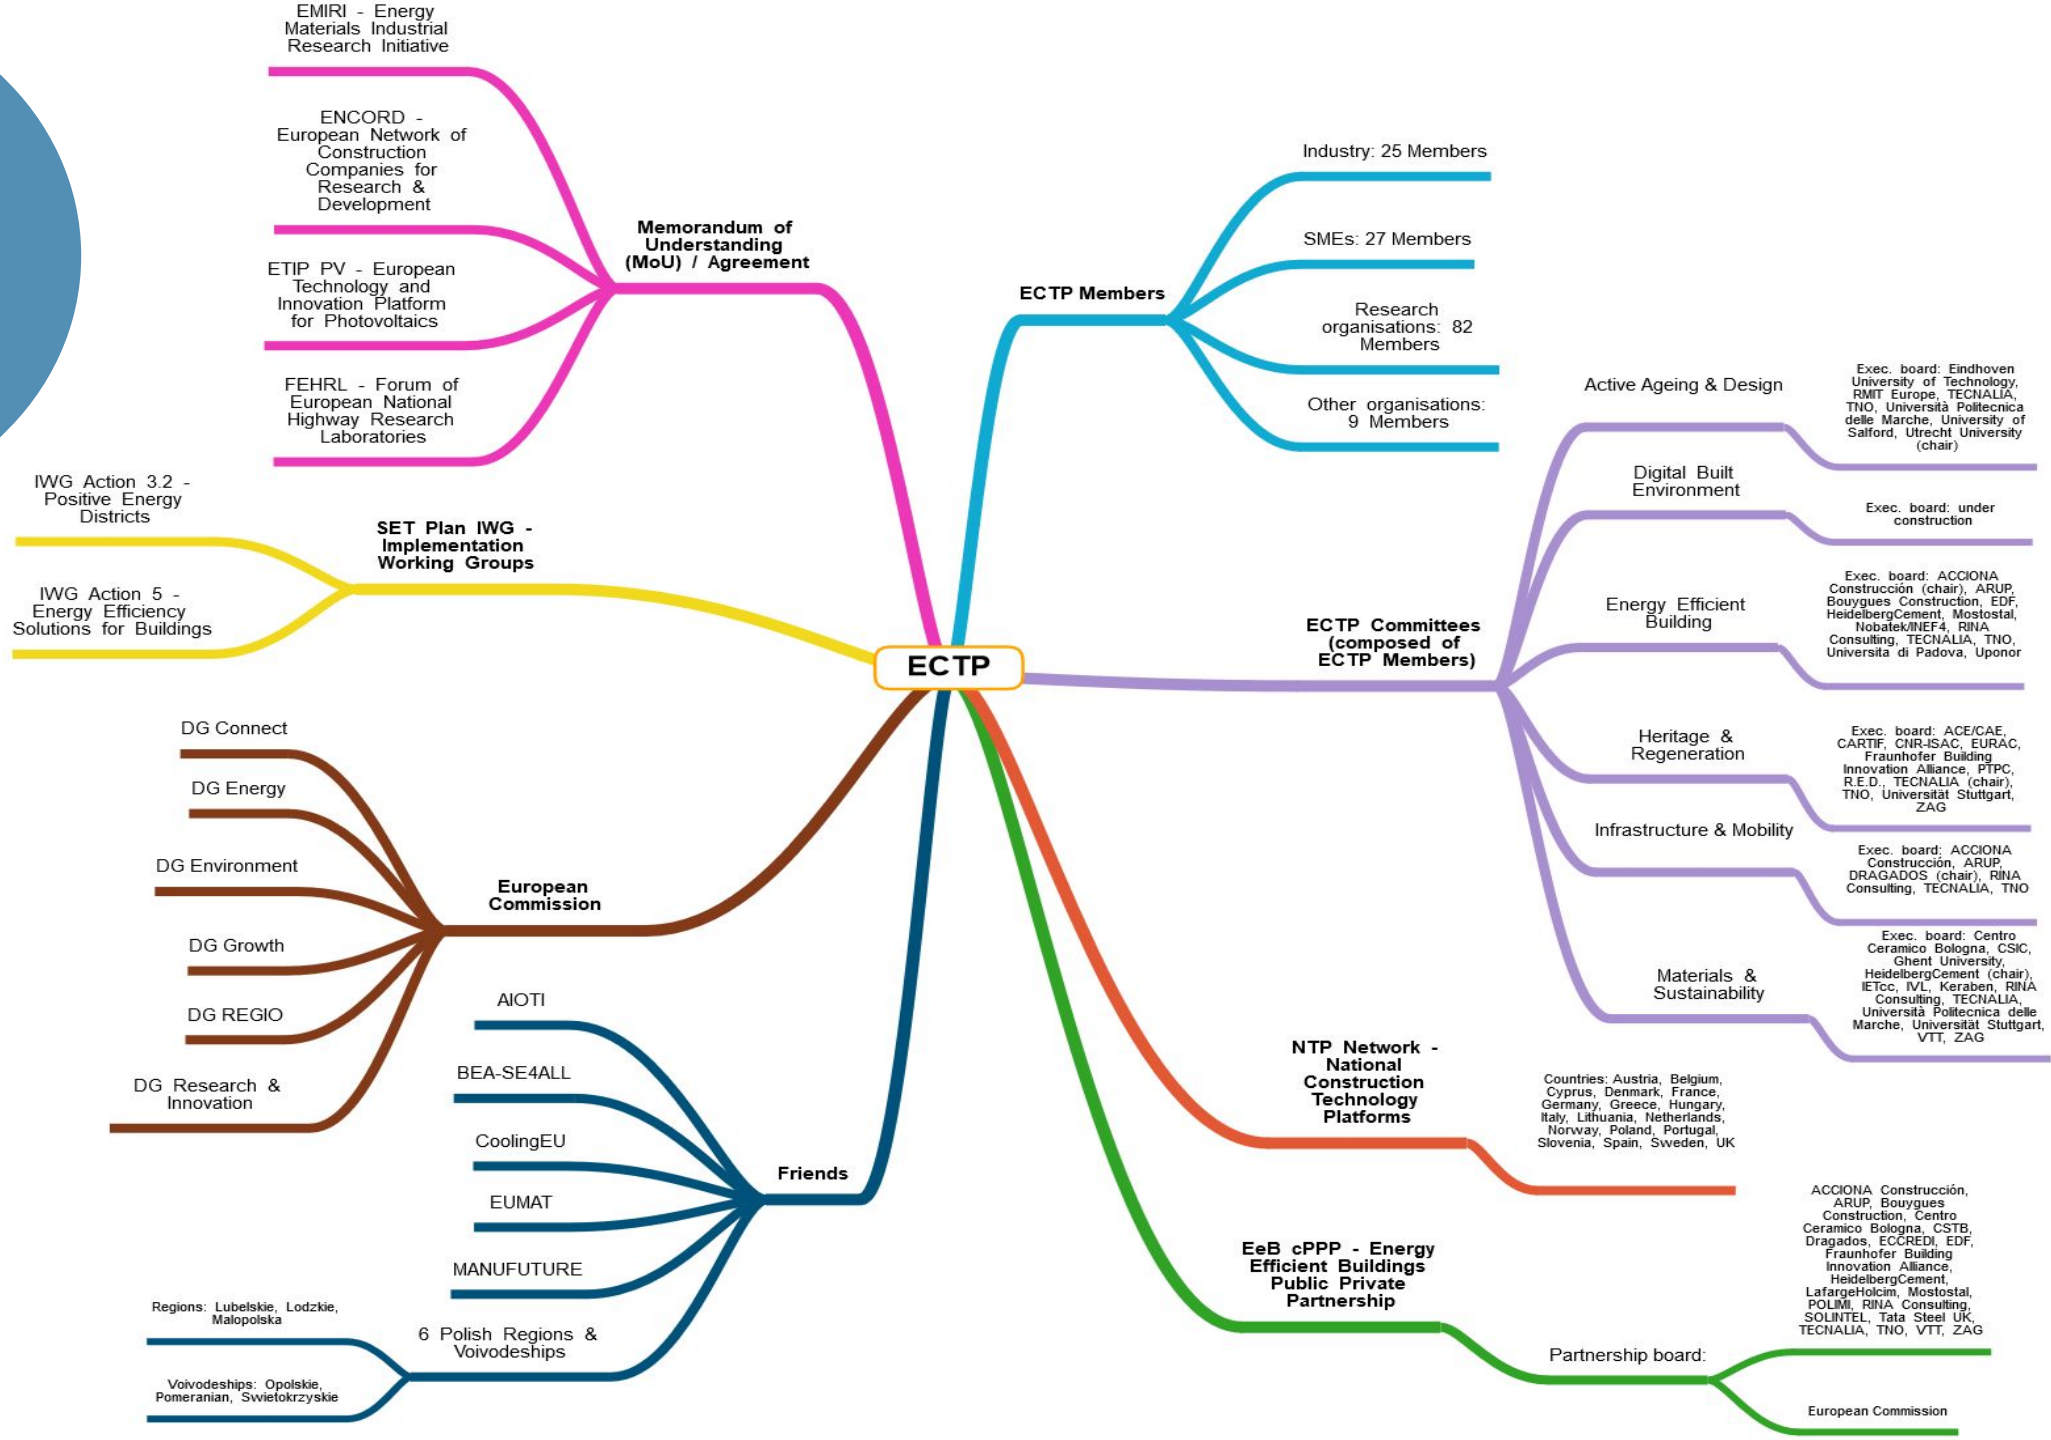

European Construction, built environment & energy-efficient buildings Technology Platform

Paramount challenges such as **energy, climate change, efficiency & more generally sustainability** prove to become of utmost importance for the **Built Environment (buildings, infrastructures, utility networks...)** and **Construction sector** and need to be tackled within an **integrated approach**

- ECTP: *AISBL* legal entity, based in Brussels
- It gathers **140+** member-organizations and **800+** individual members from the Construction sector and other sectors from the whole supply chain of the **Built Environment**.
- Main mission: develop new **R&D&I** strategies to improve **competitiveness**, meet **societal needs** & take up **environmental challenges**.

The ECTP ecosystem

ECTP: 6 Committees

ACTIVE AGEING DESIGN
AN **ECTP** COMMITTEE

MATERIALS SUSTAINABILITY
AN **ECTP** COMMITTEE

ENERGY EFFICIENT BUILDINGS
AN **ECTP** COMMITTEE

HERITAGE REGENERATION
AN **ECTP** COMMITTEE

INFRASTRUCTURE MOBILITY
AN **ECTP** COMMITTEE

DIGITAL BUILT ENVIRONMENT
AN **ECTP** COMMITTEE FOR INNOVATIVE BUILT ENVIRONMENT

Why join ECTP?

Influencing innovation and strategic research

- Participate in the definition of the European Strategic Research Agendas
- Interact with the EeB cPPP Partnership Board
- Close links with key representatives from the European Commission
- Take advantage of ECTP's strategic presence in the heart of Brussels

Access to knowledge, resource and expertise

- Information on upcoming European funding calls and programmes
- Access to ECTP publications and research
- Contribute to technology transfer and research exploitation
- Participate in experts and Committees meetings
- Private access to a Collaborative Workspace (CWS)
- Access to the dataset of sectorial projects funded by the FP7 and H2020 framework programmes

Opportunities for networking, training & development

- Discount for participants in the ECTP Biennial Conference to disseminate project outcomes
- Seminars and training to discuss technical challenges and facilitate networking
- Meet potential partners for your research projects

Key facts on the built environment

40% of EU
energy
consumption

36% of CO₂
emissions

97% of the
housing stock is
inefficient

90% of our
time indoor

75% of EU citizens
live in cities

1% renovation
rate

12% of the
building stock
is protected

7% to 12.5% of
bridges in bad
condition

34% municipalities
report
under-investment in
infrastructures

Innovation in
the sector is
an absolute
necessity

Context, industrial and technological trends

- **The built environment and related industries** must evolve towards carbon neutrality (resource efficiency, circularity, sobriety in usage)
- **Buildings as proactive part of the city**: interactive, re-natured **districts, infrastructures** integration, valorisation of **cultural heritage**
- **Ageing infrastructures** must evolve & adapt to new uses and hazards □ *Resilience*
- The **industrial (r)evolution** is still to be implemented, by integrating mature technologies (AI, automation, etc) into all processes from design to manufacturing and construction
- **Digitalisation** is to be generalised in the construction processes and in the built environment
- **Biobased and advanced materials** must be integrated to achieve more resilience, comfort, health, safety, resource efficiency, and carbon neutrality.

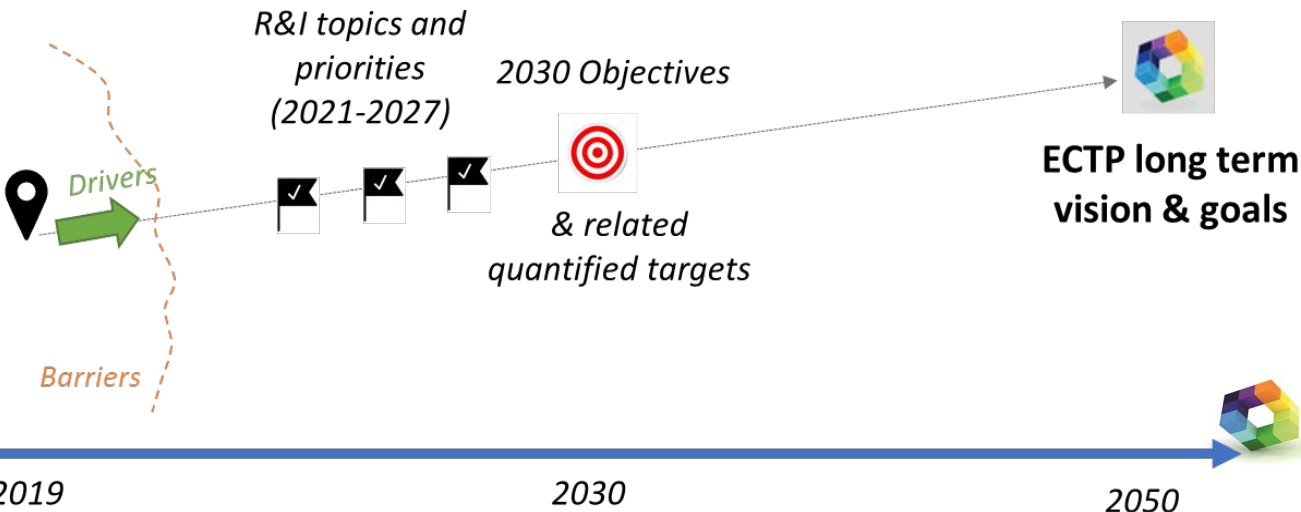

ECTP – Strategic Research & Innovation Agenda (SRIA)

Objectives of the SRIA

- Propose a vision of the future built environment and related industry sector
- Identify trends and drivers supporting this vision
- Identify priority areas for detailed technology roadmapping

Specific challenges

- Coordinate with other European associations & platforms to propose an integrated approach
- Align with *Horizon Europe* approach and deliver clear messages regarding needs for future co-programmed partnerships (future new PPPs)

ECTP - Four objectives by 2030

ECTP OBJECTIVES 2030

Clean built environment and cities

Reach the environmental & energy EU objectives 2030 thanks to affordable offers for construction, renovation and positive districts, and economically viable circularity of resources

Built for and with the people

Europe is a world leader in age-friendly, inclusive, well-interconnected spaces, participative planning & design, and valorisation of Cultural Heritage

Prosperous construction ecosystem

Gain 20% productivity through upgraded construction processes, cross-sector partnerships and skilled workforce

Digitalisation

All European construction companies including SMEs adopt digital tools in a common and open framework, to deliver smart-ready buildings & infrastructures

ECTP - R&I priorities per objective

<i>Objective</i>	<i>R&I priorities</i>
Clean built environment and cities	<ul style="list-style-type: none"> 1.1 Energy renovation of buildings and upgrading of infrastructures 1.2 Positive energy building blocks & districts, integrated with the urban networks 1.3 Life Cycle Approach and Circular Economy
Built for and with the people	<ul style="list-style-type: none"> 2.1 Participative and dynamic built environment 2.2 Inclusive and affordable built environment 2.3 Healthy and comfortable built environment 2.4 Living cultural and historical built environment
Prosperous construction ecosystem	<ul style="list-style-type: none"> 3.1 Cleaner, faster, safer and more cost-effective construction, retrofitting & commissioning processes 3.2 Improved resilience and adaptability of the built environment 3.3 New contractual processes and partnerships for the construction sector 3.4 Educational tools increasing the attractiveness and skills of the industry's careers
Digitalisation	<ul style="list-style-type: none"> 4.1 Smart operation and maintenance of buildings & infrastructures 4.2 BIM & Digital Twins for value chain integration, with focus on SMEs 4.3 Data privacy and security 4.4 Better integration of the built environment with the urban space and mobility

The Horizon Europe Framework programme structure

Pillar 1 Excellent Science

European Research Council

Marie Skłodowska-Curie
Actions

Research Infrastructures

Pillar 2 Global Challenges and European Industrial Competitiveness

Clusters

- Health
- Culture, Creativity and Inclusive Society
- Civil Security for Society
- Digital, Industry and Space
- Climate, Energy and Mobility
- Food, Bioeconomy, Natural Resources, Agriculture and Environment

Joint Research Centre

Pillar 3 Innovative Europe

European Innovation Council

European innovation
ecosystems

European Institute of
Innovation
and Technology

Widening Participation and Strengthening the European Research Area

Widening participation and spreading excellence

Reforming and Enhancing the European R&I system

Source: European Commission

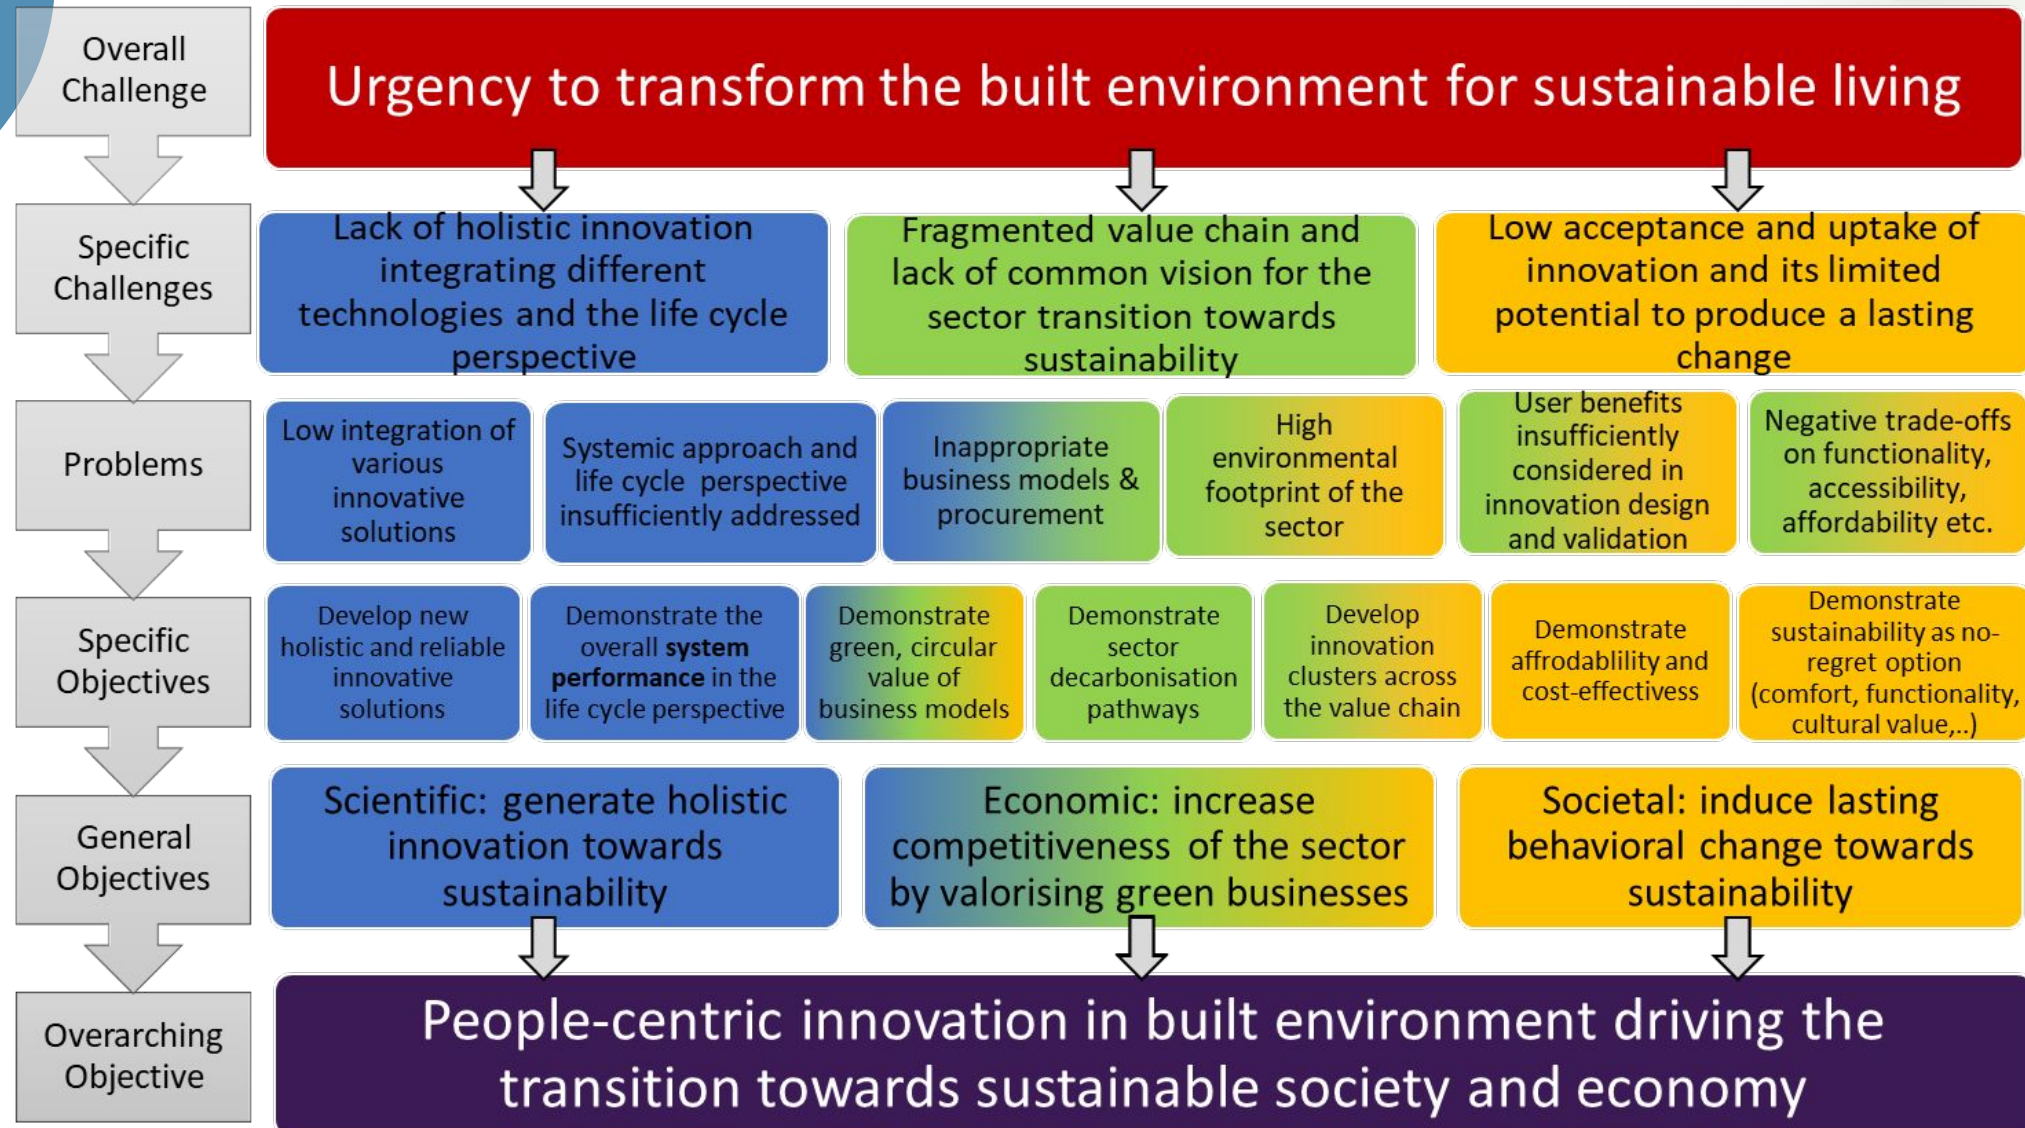

HEU partnership - “People-centric sustainable built environment” (Build4People)

Rationale

- Address **fragmentation of challenges and value chain**
- Build a supportive and **encompassing framework** to deliver on R&I for built environment sustainability and citizens’ better living.
- Requires an **integrated approach**, driven by innovation and pulled by demand for clean, safer, affordable, smarter, decarbonised and sustainable built environment.
- Build on previous initiatives (EeB cPPP) to address a **broader R&I scope**.
- Involve a **larger stakeholder community** + active **involvement of the public sector** (e.g. in relation to public procurements).
- Serve as a vehicle to **integrate R&I outputs from different parts of HEU**, in particular from Cluster Climate, Energy and Mobility, Cluster Digital, and Industry and Space - Materials – Developing Circular industry.
- **Support the mission on Climate Neutral and Smart Cities** + connections with other partnerships, e.g. Carbon Neutral and Circular Industry; Made in Europe; AI, data and robotics; Clean Energy Transition; EIT InnoEnergy
